

XI International Symposium on Computers in Education

<http://siie09.dei.uc.pt>

Coimbra, Portugal, November 18-20, 2009

The 11th edition of the International Symposium on Computers in Education (SIIE 09) will continue to promote the presentation, reflection and debate of the latest advances in research and practice in the field of Information and Communication Technologies applied to Education. This event is held alternately in Spain and Portugal and is a reference, particularly in the Ibero-American context.

Following a cycle of ten years, it is important to strength SIIE internationalization, encouraging original contributions in English (preferentially), Spanish and Portuguese. The thematic areas of the Symposium include, but are not limited to the following:

- Design, development and evaluation of educational software
- Innovative ICT experiences in education
- ICT methodologies in educational contexts
- Social aspects of ICT in educational contexts
- Teacher training in ICT
- Accessibility and usability
- Ubiquitous/mobile computing in education
- Social web, collaborative systems, communities and learning
- Web-based tools and resources
- Special Education needs and ICT
